

Setting up eduroam secure access for Android

Screen lock

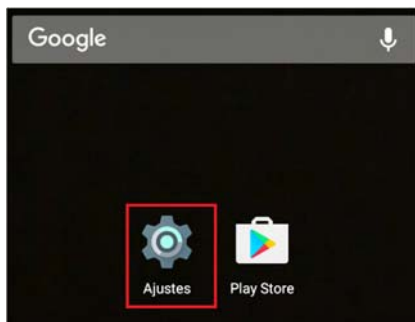

If you do not have set up a screen lock, you must do so before you start; otherwise, when installing the application you will download below, you will get an error message like this:

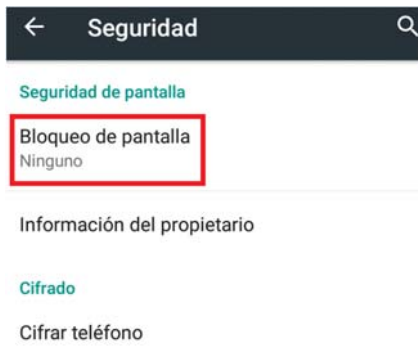

After connecting to eduroam, some devices will allow to unblock the lock; however others do not. You must check this after completing the process.

To configure the screen lock, follow these steps:

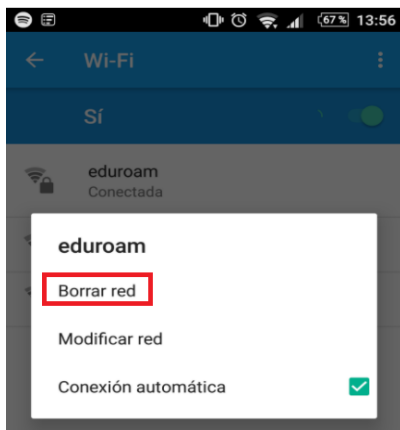

1. Enter Settings.
2. Go to the 'Personal' section and select 'Security'.

3. Choose screen lock and set it to your liking.

4. Once you have chosen the screen lock, make sure that there is no eduroam profile installed. To find out with certainty, you should go to the settings tab and select the "Wi-Fi" button. When you are there, press on the "eduroam" button on the Wi-Fi network until you get the "**Delete network**" option.

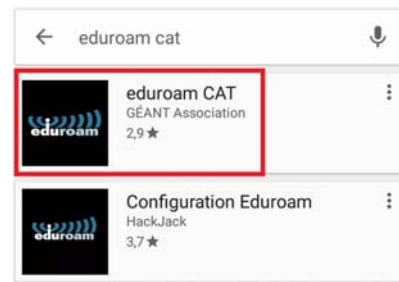

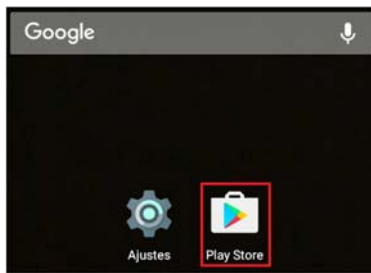

Once this screen is displayed, select "Delete Network". In this way, we make sure that no profile is installed and the installation of eduroam cat has been successfully completed.

Setting up eduroam

Connect to a network to follow these steps:

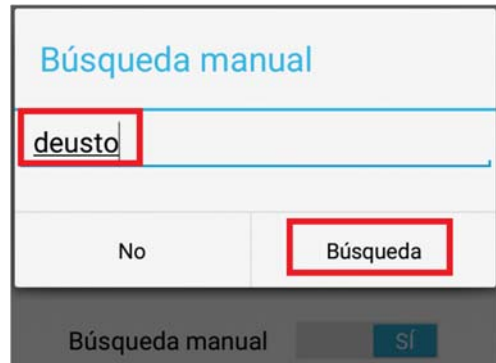

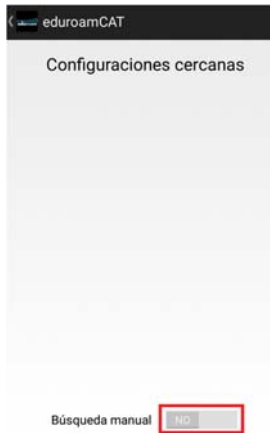

1. Enter 'Play Store'.
2. Search 'eduroam CAT'. Make sure you choose the application called 'eduroam CAT' by **GÉANT Association**.

3. Install the application and execute it.

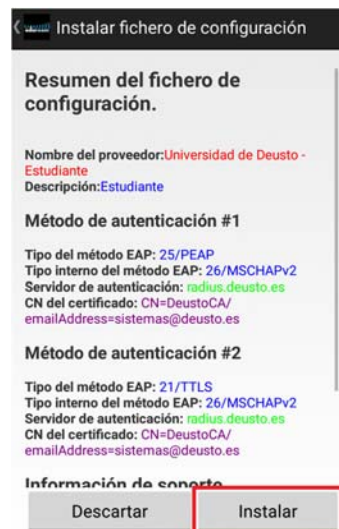

4. Activate manual search and search Deusto.

5. Select the group you belong to (Student or PASPDI) and enter your credentials. Your username is your email account including the @deusto.es o @opendeusto.es suffix.

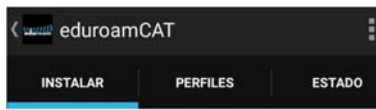

6. Select "Install":

7. Install:

8. Once you have done this, you will see a screen showing that the profile has been installed:

Usuario: cristina.libano@opendeusto.es

Contraseña: *****

Instalando un perfil reemplazará configuraciones de eduroam previas existentes

Instalar

Status:CONNECTED to SSID "UDGUEST"

- Configuración actual del
- Found SSID "eduroam" with mixed mode
 - Anon ID missing (optional)
 - User ID=cristina.libano@opendeusto.es
 - EAP Method=PEAP with Phase2:MSCHAPv2
 - CA Certificate OK
 - Server Subject Match=radius.deusto.es
